ARCHITECTURAL DESIGNING

All fine architectural values are human values, else not valuable

Architecture is a visual art & the building speak for themselves. There are three classes of people : those who see. Those who see when they are shown. Those who do not see. We know the price of success dedication, hard work & an unremitting devotion to the things you want to see happen.

A great building must begin with the unmeasurable, must go through measurable means when it is being designess & in the end must be unmeasurable.
